EDUCATION

Southern New Hampshire University —
BS Computer Science
Expected graduation date 06-2026

Kenzie Academy from Southern New Hampshire University —
Associate Front-End Web Development Certificate
08-2022

PROJECTS

Trivia Quiz Game
August 2022
JavaScript, CSS, HTML

- Created a trivia quiz game that checks knowledge using random questions from categories fetched from an API.
- Used Fetch requests to gather data such as questions, answers, and categories from an API.
- Used conditional statements to compare user answer and API answer making the game more functional.
- Created Set Interval function to time the user's response time, making the game more challenging.
- Multiple asynchronous functions were used such as Event Listeners to help the user navigate through the page.
- Displayed multiple categories by using flexbox display to give the users an option to pick from three categories.
- Used different colors and shades to make the display visually smooth.
- Included different HTML elements to display multiple sections on the website making it more readable.

Movie Catalog
June 2022-July 2022
JavaScript, CSS, HTML, Object Oriented Programming

- Created a website which displays a catalog of movie cover pictures, movie titles, movie actors and release dates.
- Used loops to gather data from objects such as pictures and the movie details, helping display matched information for each movie.
- Used spread operator to clone the objects and combine them to make a new object that matches data from each object to be displayed correctly on the page.
- Made a search bar responsive to the user by adding an asynchronous function that runs as the user is typing, helping the user find a specific movie
- Organized the layout of the page by using a grid display and displaying the movie in rows and columns making the website easy to navigate.

SKILLS

JavaScript

CSS

HTML

Object Oriented Programing

Git Bash

Time management

Task management

Excellent communication

Reporting

Logical reasoning

Problem solving

AWARDS

Amazon (DLA9)
Associate of the Month
February 2020
August 2020

LANGUAGES

Spanish-Fluent
English-Fluent

Text Analysis Box
March 2022–April 2022
 JavaScript, CSS, HTML

- Created text input box that tracks different aspects of the text being typed inside of it, helping analyze the text.
- Filtered user input to analyze the text being typed and find a number of vowels, punctuation symbols, number of characters, longest word, shortest word, and the last three words by using different string methods and loops.

WORK EXPERIENCE

Amazon, Anaheim (DCX8) — *DRIVER TRAINER*

10/2021 - PRESENT

- Attend weekly regional meetings to bridge compliance issues and report training capacity to regional managers and solve any training compliance problems.
- Facilitate training to groups of 7 employees through creatively building relationships, boosting productivity and engagement.
- Organize training events by scheduling and assigning drivers the training content, ensuring a smooth onboarding experience.

Amazon, Santa Ana (DLX8) — *DOCK LEAD/SUPERVISOR*

02/2021 - 10/2021

- Maintained a full understanding of workflow and daily production goals to ensure all freight gets sorted in a timely manner for delivery.
- Arranged associate roles by keeping track and providing feedback on their performance to maintain production rates.
- Reported and kept track of associate labor to improve station cost on employee hours.

Amazon, Santa Ana (DLX8) — YARD MARSHAL

02/2021 - 10/2021

- Made sure all trailers arrive and depart on time by creating reports and summaries to maintain compliance.
- Collected data from all loads and input it into Excel spreadsheets to track for business operations and determine staffing.
- Confirmed that all the outbound loads depart safely by securing their content and sealing trailer doors following appropriate SOP.
